DTG:

No radar or air observations during period of incident queried in urmsg 210249Z similar phenomena noted 13 and 29 Apr 50. 19 and 30 July 50, 8 Aug 50. Located between Bora Lysaya Golova and Cape Cherkasskogo are 2 confirmed and 3 probable coastal defense batteries of 6 guns each mounted in pairs. Evaluation of reported explosions by CINCAL is gunfire from above cited positions on target which was not observed from St Lawrence. Height of radar antenna at site is 640 ft with horizon at 38 miles makes doubtful explosions were observed "in water off base of mountains." See AAC Intelligence Review Nbr 50-3 and Nbr 50-8, dtd 1 Mar and 15 Sep 50 for further details Gambell observations.

14 September 1951

SUBJECT: Intelligence Report, Gambell, Alaska

TO: Commander-in-Chief
Alaskan Command
APO 942, U. S. Army

Attn: AC of S, J-2

1. The following information was reported by a member of the First Alaska National Guard Scout Battalion at Gambell, Alaska.

a. On 16 August 1951, at 1300 W, approximately ten explosions were heard originating thirty-five to forty miles Northwest of Gambell.

b. Similar explosions were again noticed at 1645 W, that same day.

2. Informant believes that the explosions heard on these two occasions were caused by the firing of heavy guns. During the period of this incident foggy weather conditions existed with Westerly winds.

AAOID-8-0906

Gambell Det rptd 43 heavy explosions at apprx Azimuth 320 degrees in separate distinct groups (12, 13 and 18) from 162300Z to 170430Z. Sound seemed to be on surface 30 to 40 miles distant and was likened to salvo of naval guns. Slight ground-tremore felt. Could possibly be shore battery firing from vicinity MYS Chukotskiy (ALGE 5215). Where previous explosions have been reported.
